NOTE

Units of Measurement

As for the previous Congresses and though some authors do not fully agree, we attempt to follow the recommendations of the International System of Units (SI).

For example, hm^3 and km^3 were preferred to 10^6 and 10^9 m^3 , or million and billion cu.m. See Bulletin 34 "ICOLD Guide for the International System of Units (SI)", page 13.

The decimal sign may be the full stop (Anglo-Saxon usage) or the comma (European usage); but as a safeguard against confusion, full stop (period) and comma are used as decimal sign only.

Where the number of digits before or after the decimal sign exceeds three, the digit should be divided into groups of three by half space.

We meet not enough co-operation from some authors writing in English who go on keeping the comma to separate the groups of three digits instead of using half space. It was not possible to make the appropriate corrections in all the tables provided by the authors and even in the text. Sorry for the inconvenience.

AVERTISSEMENT

Unités de Mesure

Comme pour les Congrès précédents et bien que certains auteurs manifestent des réticences à ce sujet, on s'est efforcé de suivre les recommandations du Système International d'Unités (SI).

Par exemple, on a utilisé plus volontiers hm^3 et km^3 au lieu de 10^6 m^3 et 10^9 m^3 ou million et milliard de mètres cubes. Voir Bulletin 34 « Guide CIGB du Système International d'Unités (SI) », page 13.

De même, on a retenu le point (usage anglo-saxon) et la virgule (usage européen) comme signe décimal, mais pour éviter toute confusion, la virgule et le point ne sont utilisés que comme signe décimal.

Aussi, quand le nombre de chiffres avant ou après la virgule est supérieur à 3, les chiffres sont groupés par 3, chaque groupe étant séparé par un court espace.

À ce sujet nous rencontrons encore des difficultés de la part de quelques auteurs de langue anglaise qui continuent à utiliser la virgule au lieu d'un court espace pour séparer les groupes de trois chiffres. Nous n'avons pas pu apporter les corrections nécessaires dans tous les tableaux fournis par les auteurs et même dans le texte. On voudra bien nous en excuser.

PAPERS ON Q 79

RAPPORTS SUR LA Q 79

QUESTION

79

**Gated spillways and other controlled release facilities,
and dam safety**

Subject

- a)* Design criteria for the selection of hydromechanical equipment.
- b)* Selection of gated or ungated spillways : economics, flood warning, operational strategies, management responsibilities, operator training, automatic operation.
- c)* Operational reliability of controlled release facilities, surveillance, routine inspection and testing.
- d)* Case studies of performance of hydromechanical equipment.

**Évacuateurs de crue vannés, autres organes
d'évacuation contrôlés, et sûreté des barrages**

Objet

- a)* Critères pour le choix de l'équipement hydromécanique.
- b)* Choix entre évacuateurs vanné et non vanné, prenant en compte l'analyse économique, le système d'annonce des crues, les stratégies d'exploitation, les responsabilités de gestion, la formation des opérateurs, l'exploitation automatisée.
- c)* Fiabilité de l'exploitation des organes d'évacuation contrôlés, surveillance, inspections périodiques et essais.
- d)* Études de cas de fonctionnement de matériel hydromécanique.

TABLE OF CONTENTS
OF PAPERSTABLE DES MATIÈRES
DES RAPPORTS

R. 1. JIN, T., LIU, Z., WU, Y., ZHANG, D. (<i>China</i>) Hydraulic design and research on gates for large dams in China.....	1
R. 2. WANG, J., DENG, Z., XIE, S., LI, S. (<i>China</i>) Damage and repair of the right stilling basin in Wuqiangxi hydroelectric projet.....	19
R. 3. RITCHIE, P. D., HO, K. V., CURRIE, B. H. (<i>New Zealand</i>) Matahina power station - Upgrading of the spillway gates to ensure operation after the maximum credible earthquake....	37
R. 4. ZIANI, M., EL JAHRANI, A., EL MOHAMMADI, N. (<i>Maroc</i>) Évacuateur de crue du barrage Al Wahda	53
R. 5. TORRES CEREZO, J., MORAN CABREROS, J., MARTINEZ MARIN, E. (<i>Spain</i>) Factors to be considered when deciding lateral spillways with or without gates. Special consideration to labyrinth spillway type.....	67
R. 6. LAHJOMRI, C., JABIRI, M., OUKNIDER, A. (<i>Maroc</i>) Évacuateur de crue du barrage de garde sur l'Oued Sebou	77
R. 7. MORGENSCHWEIS, G., FRANKE, P. (<i>Germany</i>) Experience with ultrasonic flowmeters in the bottom-outlet of the Bigge dam	95
R. 8. CHRAIBI, A. F., ARJOUAN, M. (<i>Maroc</i>) Barrage Sidi Mohamed Ben Abdallah. Conception de l'évacuateur de crue	111
R. 9. DANIELL, W. E., TAYLOR, C. A. (<i>United Kingdom</i>) The seismic safety evaluation of a radial flood gate	123
R. 10. DIAS, C. C., GUSMAO, L. (<i>Portugal</i>) L'expérience portugaise dans le domaine des équipements hydromécaniques d'évacuateurs de crue.....	133
