Journal of  
**Geotechnical  
Engineering**

AMERICAN SOCIETY OF CIVIL ENGINEERS

GEOTECHNICAL ENGINEERING DIVISION

## General Information

**Journal of Geotechnical Engineering** covers the broad area of practice known as geotechnical engineering. Papers are welcomed on traditional topics such as foundations, earth-supported structures, soil dynamics, consolidation, engineering behavior of soil and rock, slope stability, dams, and rock engineering. Authors are encouraged to submit papers on newer topics such as environmental geotechnics, geosynthetics, computer modeling, ground-water monitoring and restoration, and coastal and geotechnical ocean engineering. Theoretical papers dealing with geomechanics are welcome, but only if there is a clear and significant potential for practical application, in the present or future, for the theory. Practice-oriented papers and case histories are particularly welcomed and encouraged.

*Journal of Geotechnical Engineering* (ISSN 0733-9410) is published monthly by the American Society of Civil Engineers. Publications office is at 345 East 47th Street, New York, NY 10017-2398. All editorial correspondence should be directed to the Journals Department. Second-class postage is paid at New York, NY, and at additional mailing offices.

**Postmaster:** Send address changes to *Journal of Geotechnical Engineering*, ASCE, 345 East 47th Street, New York, NY 10017-2398.

**Submission of papers.** Submit five copies of papers and notes and three copies of discussions to the Journals Department. Maximum length for papers is 10,000 words; for notes, 3,500 words; for discussions, 1,250 words. Multiple submissions are not accepted for review. Indicate division and, if applicable, committee to which material is being submitted. The primary use of SI units is mandatory. When SI units are used, no other units are required. Units other than SI may also be given in parentheses or in an appendix. Write or phone the Journals Department for *ASCE Authors' Guide to Journals, Books, and Reference Publications* for complete instructions for manuscript preparation.

**Reprints** for authors can be ordered prior to publication using reprint order forms provided by the Editorial Department.

**Photocopies.** Authorization to photocopy internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by ASCE to libraries and other users registered with the Copyright Clearance Center, (CCC) Transactional Reporting Service, provided that the base fee of \$1.00 per article plus \$.15 per page is paid directly to CCC, 27 Congress Street, Salem, MA 01970. The identification for *Journal of Geotechnical Engineering* is 0733-9410/93 \$1.00 + \$.15. Requests for special permission or bulk copying should be addressed to the Journals Reprint Department, ASCE.

**Subscriptions.** 1993 rates are \$49.00 for members and \$196.00 for nonmembers. Postage outside the U.S.A. is \$28.00 additional. Single copies are \$20.00. Address all *member* subscription inquiries and correspondence to Member Records, ASCE. Address all *nonmember* inquiries and correspondence to Publications Fulfillment Department, ASCE. Subscriptions are filled for the calendar year and must be prepaid. Notify the appropriate ASCE department of an address change as soon as possible; allow six weeks for it to become effective.

**This publication is abstracted** in *ASCE Publications Information* (bi-monthly), *Transactions of the ASCE* (annually), and Civil Engineering Database (on-line), and indexed in *ASCE Annual Combined Index*. Address inquiries to Information Products, ASCE.

The Society is not responsible for any statement made or opinion expressed in its publications.

*This journal is printed on an acid-free paper, which meets the ANSI requirements for permanence.* Ⓢ™

## TECHNICAL PAPERS

Five copies of the original paper (and all figures and tables) should be submitted to the Journals Department, ASCE, 345 East 47th Street, New York, NY 10017-2398. Authors must indicate the technical division or council and, in some cases, the technical or task committee to which the paper is submitted. The review and publication procedures will be faster if the basic requirements, listed below, are followed.

1. The length of titles must not exceed 70 characters and spaces.
2. The manuscript must be typed double-spaced (including abstract and references) on one side of 220 mm × 280 mm paper.
3. The maximum length of a paper is 10,000 words or word-equivalents. Approximate the length by counting the number of words on a typical manuscript page and multiplying that by the number of total pages (except for tables and figures). Add word-equivalents for figures and tables by estimating the portion of the journal page each will occupy when reduced, usually 75% to 50%, to fit on a 76 mm × 110 mm journal page. (A journal page is approximately 520 words; e.g., a figure reduced to one-half a journal page would be 260 word-equivalents.) When reduced, the figure must be legible and its type no smaller than 6 point (2.12 mm). The overlength aspect of papers that are positively reviewed must go through a special approval process prior to publication; however, valuable overlength contributions are not intended to be discouraged by this procedure.
4. Authors need not be Society members. Each author's full name, Society membership grade (if applicable), present title and affiliation, and complete mailing address must appear as a footnote at the bottom of the first page of the paper.
5. All mathematics must be typewritten, and special symbols identified. Letter symbols should be defined in text when they first appear and arranged alphabetically in an "Appendix. Notation" at the end of the paper.
6. Use standard definitions and symbols. Reference should be made to the lists published by the American National Standards Institute and the *ASCE Authors' Guide to Journals, Books, and Reference Publications*.
7. Figures should be drawn or plotted in black ink, or laser printed.
8. Each table must be typed on one side of a single 220 mm × 280 mm sheet of paper.
9. References cited in text should be listed in alphabetical order in an "Appendix. References," double-spaced, and placed at the end of the paper (but preceding any "Appendix. Notation").
10. Provide a list of nine or so key words and an abstract of 175 words.
11. A set of conclusions must end the paper.
12. Each author must use SI (International System) units and units acceptable in SI. Other units may be given in parentheses or in an appendix.
13. Include a practical applications section, if applicable.
14. If experimental data and/or relations fitted to measurements are presented, the uncertainty of the results must be stated. The uncertainty must include both systematic (bias) errors and imprecisions.

## TECHNICAL PAPERS

Deformation Analysis of Embankments.

**N. Loganathan, A. S. Balasubramaniam, and**

**D. T. Bergado** ..... 1185

Oxygen Diffusion through Soil Covers on Sulphidic  
Mine Tailings.

**Ernest K. Yanful** ..... 1207

Cohesion Intercept in Effective Stress-Stability Analysis.

**G. Mesri and M. E. M. Abdel-Ghaffar** ..... 1229

Electrical Response of Two-Phase Soil: Theory and  
Applications.

**S. Thevanayagam** ..... 1250

Project VELACS—Control Test Results.

**K. Arulanandan and R. F. Scott** ..... 1276

Field Behavior of Instrumented Geogrid Soil  
Reinforced Wall.

**K. L. Fishman, C. S. Desai, and R. L. Sogge** ..... 1293

## DISCUSSIONS

Settlements of Shallow Foundations on Cohesionless Soils.

Basil P. Papadopoulos.

**By Venanzio R. Greco** ..... 1310

Steady-State Strength Analysis of Lower San Fernando  
Dam Slide. Gonzalo Castro, Raymond B. Seed,  
Thomas O. Keller, and H. Bolton Seed.

**By Robert W. Day. By H. John Hovland. By**

**John L. Vrymoed. Closure by Gonzalo Castro,**

**Raymond B. Seed, and Thomas O. Keller** ..... 1313

Performance of Test Embankment Constructed to Failure  
on Soft Marine Clay. B. Indraratna,

A. S. Balasubramaniam, and S. Balachandran.

By Edward W. Brand. By Siew-Ann Tan. Closure by

B. Indraratna and A. S. Balasubramaniam..... 1321
