

PERGAMON INTERNATIONAL LIBRARY
of Science, Technology, Engineering and Social Studies
*The 1000-volume original paperback library in aid of education,
industrial training and the enjoyment of leisure*
Publisher: Robert Maxwell, M.C.

THE DESIGN OF PILED FOUNDATIONS

Publisher's Notice to Educators

THE PERGAMON TEXTBOOK INSPECTION COPY SERVICE

An inspection copy of any book published in the Pergamon International Library will gladly be sent without obligation for consideration for course adoption or recommendation. Copies may be retained for a period of 60 days from receipt and returned if not suitable. When a particular title is adopted or recommended for adoption for class use and the recommendation results in a sale of 12 or more copies, the inspection copy may be retained with our compliments. If after examination the lecturer decides that the book is not suitable for adoption but would like to retain it for his personal library, then our Educators' Discount of 10% is allowed on the invoiced price. The Publishers will be pleased to receive suggestions for revised editions and new titles to be published in this important International Library.

STRUCTURES AND SOLID BODY MECHANICS

General Editor: B. G. NEAL

SOME OTHER BOOKS IN THIS SERIES

AKROYD, T. N. W.

Concrete: Its Properties and Manufacture

ALLEN, H. G.

Analysis and Design of Structural Sandwich Panels

BROWNE, J. S. C.

Basic Theory of Structures

DUGDALE, D. S.

Elements of Elasticity

DYM, C. L.

Introduction to the Theory of Shells

LIVESLEY, R. K.

Matrix Methods of Structural Analysis

NEAL, B. G.

Structural Theorems and their Applications

RAUDKIVI, A. J.

Loose Boundary Hydraulics

The terms of our inspection copy service apply to all the above books. Full details of all books listed and specimen copies of journals listed will gladly be sent upon request.

Whitaker, Thomas.
The design of piled foundations.

(Structures and solid body mechanics) (Pergamon international library of science, technology, engineering, and social studies)

Bibliography: p.

Includes index.

1. Piling (Civil engineering) I. Title.

TA780.W5 1975 624'.154 75-19317

ISBN 0-08-019706-X

ISBN 0-08-019705-1 pbk.

CONTENTS

Acknowledgements	ix
1 Introduction	1
<i>Units of measurement</i>	3
2 Where piles are used	4
<i>The typical ground conditions</i>	4
<i>Site investigations</i>	6
3 Types of piles and their construction	8
<i>Pile classification</i>	8
<i>Displacement piles</i>	8
<i>Non-displacement piles</i>	12
<i>Screw piles</i>	16
<i>Pile installation</i>	17
<i>The structural strength of piles</i>	23
4 Driving formulae	26
<i>Introduction</i>	26
<i>Formula 1</i>	27
<i>Formula 2</i>	27
<i>Formula 3</i>	29
<i>Formula 4</i>	30
<i>Formula 5</i>	31
<i>Formula 6</i>	31
<i>Formula 7</i>	32
<i>Formula 8</i>	32
<i>Formula 9</i>	33
<i>Formula 10</i>	34
<i>The practical application of driving formulae</i>	38
<i>The limitations of driving formulae</i>	43
5 Pile driving by vibration	48
<i>Introduction</i>	48
<i>The theory of vibration driving</i>	51
<i>General comment</i>	54
<i>Vibratory impact drivers</i>	55

6	The calculation of the ultimate bearing capacity of a pile from soil properties	57
	Introduction	57
	Early formulae	60
	Recent formulae	62
	Practical methods of calculating the ultimate bearing capacity	67
	Piles that are end-bearing in sand or gravel	67
	The standard penetration test	70
	The Dutch cone penetrometer	73
	Other types of penetrometers	81
	Piles in clay	81
	Load carried by the base of a pile in clay	82
	Driven piles	83
	Bored piles	86
	Large bored piles with enlarged bases	88
	The effective stress method	95
	Field tests for base and shaft resistance	99
	Pile foundations carried to rock	101
	Driven piles	102
	Bored piles	104
7	The settlement of single piles and the choice of a factor of safety	106
	Introduction	106
	The settlement of a friction pile in clay	106
	The settlement of piles in any soil	110
	The choice of a factor of safety to ensure that the ultimate bearing capacity is not exceeded	110
	The choice of a factor of safety to limit the settlement at working load	113
8	Piles in soft soils	127
	The buckling of slender piles	127
	Negative skin friction	129
9	Pile testing	135
	Inspection during installation	135
	Testing the condition of a pile after installation	137
	Loading tests	142
	Loading systems	142
	The measurement of settlement	145
	Testing procedures	146
	The maintained load test	146
	The maintained load test for determining ultimate bearing capacity	149
	The constant rate of penetration test for determining ultimate bearing capacity	150

10	Piles in groups with vertical loading	156
	<i>Introduction</i>	156
	<i>Pile groups in clay</i>	158
	<i>When not to use piles</i>	171
	<i>Pile groups in sand</i>	171
11	Horizontal forces on piles and pile groups	176
	<i>Introduction</i>	176
	<i>Single piles</i>	177
	<i>Groups of vertical piles</i>	181
	<i>Groups with both vertical and inclined piles</i>	184
	<i>Graphical method for piles in three directions</i>	186
	<i>Methods based on elastic theory</i>	187
	<i>The choice of a design method</i>	188
12	The durability of piles	191
	<i>Mechanical damage</i>	191
	<i>Chemical damage</i>	192
	<i>Steel piles</i>	192
	<i>Concrete piles</i>	194
	<i>Biological damage</i>	196
	<i>Damage due to industrial wastes</i>	198
	References	199
